What is Plagiarism?

“reproducing the work on another person without appropriate citations and references”

- *APIIT/APU Procedure for Dealing with Academic Dishonesty, 2018*

Types of Plagiarism

Unintentional

Intentional

Unintentional Plagiarism

Failure to award proper credit to other people's work without explicit intention to cheat.

Unintentional Plagiarism

Incorrect Citation

- Wrong in-text citation style.
- Citing wrong authors.
- Not sure how to cite the sources.

Not citing paraphrased info/ Inaccurate paraphrasing

- Misbelief that citation is needed only for direct quote and not for paraphrased info.
- Misbelief that paraphrased means changing a word or two or rearranging the sentences of the authors.

Note: Applied to Level 0 and Level 1 students

Unintentional Plagiarism: Example

Giddens (1976, p. 107) argues that the rule systems are constantly in process, subject to chronic ambiguities of interpretation and continual transformation in the course of the production and reproduction of social life.

Problem: Missing Quotes

Correction:
Giddens (1976, p. 107) argues
that “the rule systems life”.

Note:

- The student is at an early stage of studies.
- The quotes are within the 15% limit.

Note: Applied to Level 0 and Level 1 students

Unintentional Plagiarism: Example

Source Text:

From a class perspective this put them [highwaymen] in an ambivalent position. In aspiring to that proud, if temporary, status of 'Gentleman of the Road', they did not question the inegalitarian hierarchy of their society. Yet their boldness of act and deed, in putting them outside the law as rebellious fugitives, revived the 'animal spirits' of capitalism and became an essential part of the oppositional culture of working-class London, a serious obstacle to the formation of a tractable, obedient labour force. Therefore, it was not enough to hang them – the values they espoused or represented had to be challenged.

Paraphrase Text:

By aspiring to the title of 'Gentleman of the Road', highwaymen did not challenge the unfair taxonomy of their society. Yet their daring exploits made them into outlaws and inspired the antagonistic culture of labouring London, forming a grave impediment to the development of a submissive workforce. Ultimately, hanging them was insufficient – the ideals they personified had to be discredited.

Problem: Inaccurate paraphrasing. Misbelief that the structure of the paraphrase sentence can be the same.

Note: Applied to Level 0 and Level 1 students

Source: University of Oxford

Types of Intentional Plagiarism

a) Complete
plagiarism

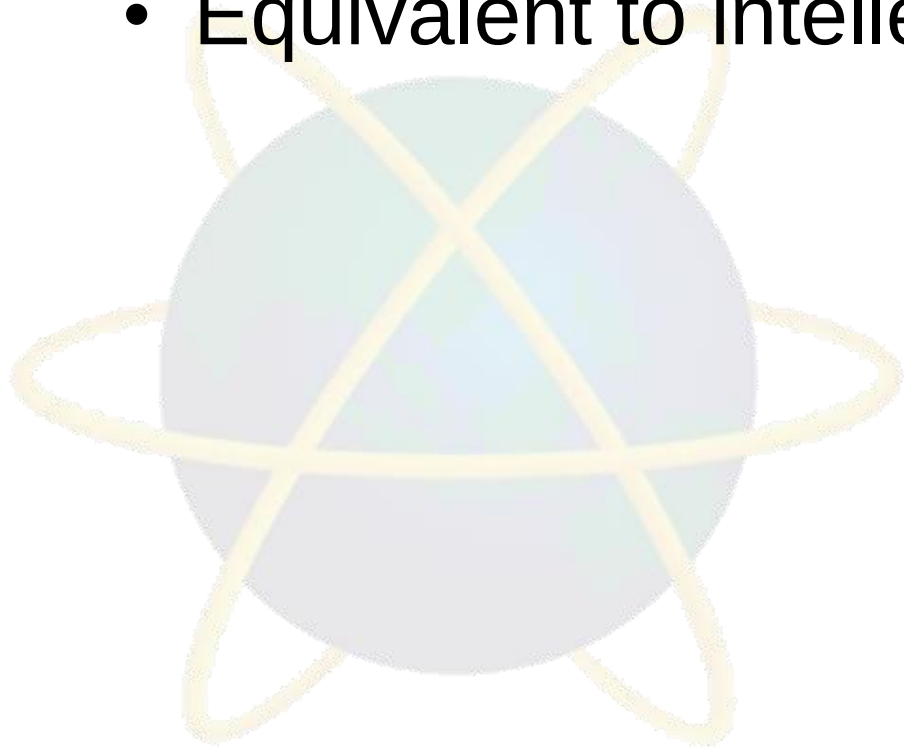

b) Verbatim
plagiarism

c) Paraphrasing
plagiarism

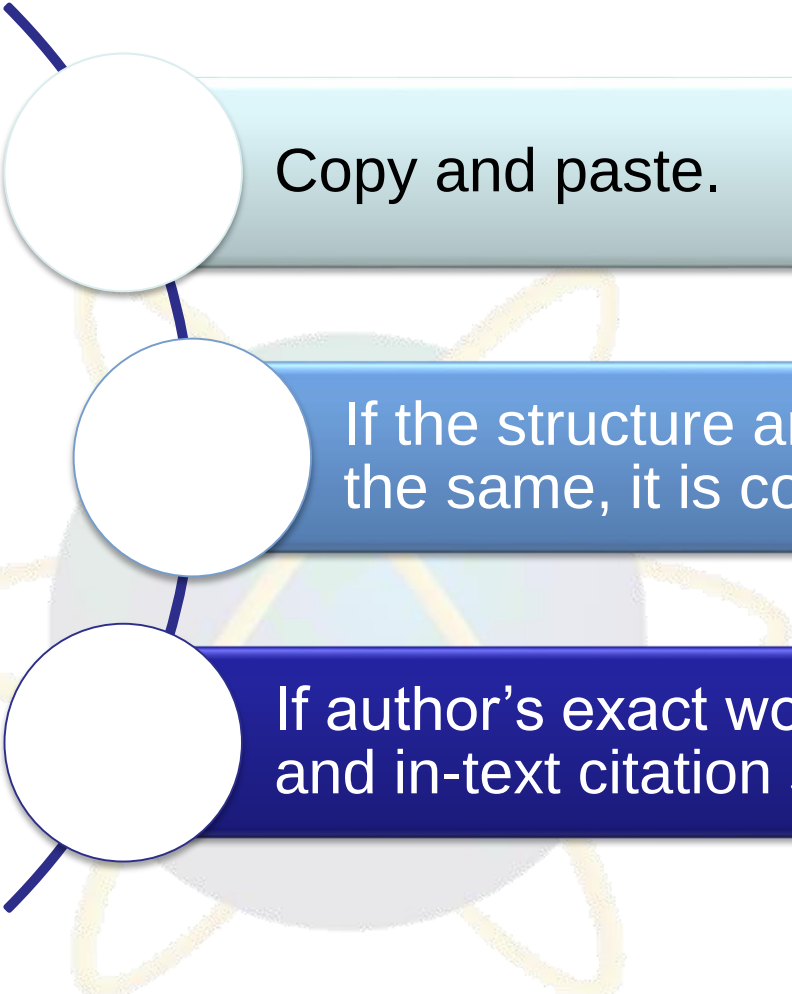

d) Mosaic
plagiarism

Intentional: Complete Plagiarism

- Submit someone else's works under his or her own name.
- Equivalent to intellectual theft and stealing.

Intentional: Verbatim plagiarism

Copy and paste.

If the structure and the majority of the words are the same, it is considered as verbatim plagiarism.

If author's exact words are used, quotation marks and in-text citation should be included.

Intentional: Examples of Verbatim plagiarism

This exact motto explains that even though every country in the European Union might be different they can still be united to serve and help each other. In the recent years the European Union's goal is to unite all the countries in Europe and to create a European identity to which every country could connect in order be United in diversity as the motto suggests. The lack of European identity is the main reason for the European Union to try and reach this goal. The European Union can't seem to create a sense of patriotism towards Europe as a whole like people would have or have for their country.

1.2 Prior studies

2 Early theorists of European integration speculated that economic integration would lead to political integration and a European identity. A European identity has not displaced national identities in the EU, but, for a significant share of EU citizens, a European identity exists alongside a national identity. At the same time, political parties asserting more traditional nationalist identities and policies have directed their dissatisfaction against immigrants, foreigners and, sometimes, the EU. Those who participate in 'Europe' are more likely to develop a European identity, while those whose economic and social horizons are essentially local are more likely to assert nationalist identities.

1.3 Research question

In this study the line of research on what is needed in order to create a European Identity will be continued. The focus of this research lies, on how affiliated Europeans are to the European Union.

udies edited by Alec Stone Sweet and Walter Mattli. We would like to thank the editors, the other participants in the issue, and the outside reviewers for their comments on an earlier draft. Abstract
Early theorists of European integration speculated that economic integration would lead to political integration and a European identity. A European identity has not displaced national identities in the EU, but, for a significant share of EU citizens, a European identity exists alongside a national identity. At the same time, political parties asserting more traditional nationalist identities and policies have directed their dissatisfaction against immigrants, foreigners, and, sometimes, the EU. Those who participate in "Europe" are more likely to develop a European identity, while those whose economic and social horizons are essentially local are more likely to assert nationalist identities.

2 Introduction The endpoint of European integration has always remained ambiguous. The founders of the EU started out with relatively modest goals: the creation of a European common market

Intentional: Paraphrasing plagiarism

- Rephrasing the contents from others' works without citation.
- Translation from one language to another language without citation is also plagiarism.

Note: Applied to Level 2 and Level 3 students

Intentional: Examples of Paraphrasing plagiarism

☰ Table of contents

original source. A translation without a source is still plagiarism, as you're using someone else's ideas.

Example of paraphrasing

Incorrect	Correct
Original (Cronon, 1995)	Incorrect (no citation)
"Go back 250 years in American and European history, and you do not find nearly so many people wandering around remote corners of the planet looking for what today we would call 'the wilderness experience.' As late as the eighteenth century, the most common usage of the word 'wilderness' in the English language referred to landscapes that generally carried adjectives far different from the ones they attract today. To be a wilderness then was to be 'deserted,' 'savage,' 'desolate,' 'barren' – in short, a 'waste,' the word's nearest synonym. Its connotations were anything but positive, and the emotion one was most likely to feel in its presence was 'bewilderment' or terror."	Before the 18th century, the word "wilderness" had very different associations than it does today. Far from being tourist attractions, wilderness areas were considered bleak, barren places that inspired fear and confusion – landscapes to be avoided rather than actively sought out.

Note: Applied to Level 2 and Level 3 students

Intentional: Mosaic Plagiarism

- Copy phrases, words from different sources and combined it as own work.
- Also known as patchwork plagiarism.

Intentional: Examples of Mosaic Plagiarism

3. Data and Operationalization

3.1 Data

In order to test the hypotheses formulated in the previous chapter and eventually give a proper answer to the research question the data set that will be used is the European Value Study (2008), the European Values Study is a large-scale, time-intensive survey on basic human values. It provides insights into the values, beliefs and preferences of citizens all over Europe. It is a unique research project on how Europeans think about life, family, work, religion, politics and society. The European Values Study was launched in 1981, when a couple of hundred citizens in the European Member States were interviewed using standardized questionnaires. Every nine years, the survey is repeated in an increasing number of countries.

Not all the respondents of the original data sample are included in the analysis. People who did not answer one or more of the questions included, are filtered out of the dataset. The final number of respondent has been brought down to a sample analysis of 60077 respondents.

3.2 operationalization

often. We are not content with delivering bundles of documents or plans. We don't count those as true deliveries. Our eye is on the goal of delivering software that satisfies the customer's needs. 4. **Businesspeople and developers must work together daily throughout the project.** In order for a project to be agile, customers, developers, and stakeholders must have significant and frequent interaction. A software project is not like a fire-and-forget

20
Businesspeople and developers must work together daily throughout the project.

Bring in business teams to work with developers. Create a meeting room for them to have a discussion and, provided throughout the project period, to form tight-knit societies, neighbours need to cooperate. As collaboration is necessary for almost every environment. (Moseley, n.d.)

7
Build projects around motivated individuals. Give them the environment and support they need and trust them to get the job done.

To build your projects around motivated people. People on software teams are supported by a belief that the product is worth creating and a belief that the team will fulfill goals fairly. Creating an environment for them that isn't the same, will help drive intrinsic motivation by

Self Plagiarism

- Reuse the works previously submitted.
- Examples:
 - Submit the similar works to two different modules.
 - Use the ideas or phrases from previous submitted works without citation.
 - Paraphrase previous phrases/ sentences submitted without proper citation.

Self Plagiarism

- It is a must to acknowledge the original report and the amount of work reused.
- Especially in the following modules:
 - Research Methodology assignment
 - Investigation Report
 - Final Year Project
 - Or any other assignments.

Action

Poor Academic Performances	Poor Academic Performance Action
• Wrong/missed citation • Double quotes missing • Unintentional gain of unfair advantage by student • Poor academic practices	 <pre> graph LR A["Module Lecturer (ML) detects Poor academic performances in the work submitted by the student"] --> B["ML to take one or more of following action(s): a. Marks to be deducted accordingly by the ML, for the element of assessment. b. Comment: 'Poor academic practice'"] </pre>

Intentional gain of unfair advantage by student	Module Lecturer detects plagiarism in the work submitted by the student → - Reports to University ADP - University invites the student to attend University ADP (VC, HoS, One AS, Registrar and School Admin).

APU Default Citation Style

American Psychological Association (APA) Style

- Effective Date: Immediate effect
- For more reference, visit to :
<https://library.apiit.edu.my/apa-referencing/>

When and How to Cite?

Images, Graphics, Diagrams,
Charts. Tables....etc

- Full sources not citations.

Paraphrase

- The original author must be cited.

When and How to Cite?

Direct Quotation (Less than 40 words)

- Use quotation marks (“...”) and include location like page, paragraphs in the in-text citation.
- Example:
Effective teams can be difficult to describe because “high performance along one domain does not translate to high performance along another” (Ervin et al., 2018, p. 470).

Direct Quotation (40 words or more)

- Use indent the whole block 0.5 in. from the left margin
- Example :
Researchers have studied how people talk to themselves:

• Inner speech is a paradoxical phenomenon. It is an experience that is central to many people’s everyday lives, and yet it presents considerable challenges to any effort to study it scientifically. Nevertheless, a wide range of methodologies and approaches have combined to shed light on the subjective experience of inner speech and its cognitive and neural underpinnings. (Alderson-Day & Fernyhough, 2015, p. 957, cited in APA Publication Manual (n.d).)

When not to cite?

- Common Knowledge

“.....President of the US”.

- “..... original ideas that have not been submitted”

- “..... own results that have not been submitted”
